

REO Manager

Treadstone is pleased to announce the launch of its custom REO Management platform, TSREO. This secure, web-based Management system has been tailored to meet the needs our REO clientele. Armed with the latest cutting edge cross-platform capability, TSREO allows our REO Managers to log into our database and access the information they need 24x7x365.

As a leader in the industry, Treadstone recognizes the inability of many REO Brokers to perform task management and property updates in a timely fashion. With TSREO, we provide you with up to the minute property status updates, accurate MSR's, Transaction Coordination, Premiere Marketing and Database campaigns, acute repair estimates and market projections.

In other words, TSREO is a compliment to the already unprecedented service provided by Treadstone Realty Group. TSREO is a mega management platform that cannot be out grown, therefore our system develops as your needs develop. Just another way that Treadstone Realty Group delivers on our promise of fanatical dedication to excellence and professional customer service.
